Installation – Supported Installations

If you purchased installation with your script purchase, please submit a ticket at: http://www.x10media.com/support and submit a ticket to our install team. Once we receive the request, your install should be completed within 24 hours. Sometimes less. (depending on holidays).

Script Installation – Unsupported Installations

If you did not purchase professional installation but would like us to install, please visit http://www.x10media.com/orders, if you would like to install yourself, you can do the following:

- Upload all the files and folders to your site.
- Upload includes/vars.php files in BINARY mode.
- CHMOD (777) the following files and folders
  - /includes/config.php
  - /graphic/
  - /graphic/thumbs

- Run the installer by loading your site:
  http://www.yourdomain.com/

- After installation is complete please make sure to delete the install folder, and return includes/config.php back to (644). IF YOU DO NOT DELETE THE INSTALL FOLDER YOUR SITE WILL NOT LOAD!

Once the installation is complete you should be able to access the admin control panel (http://www.yourdomain.com/admin.php) and use the following login details:

Password: password

Upon logging in, we **STRONGLY** suggest to change your password.

If for any reason you need installation support, you can still purchase installation from http://www.x10media.com/orders.

FAQ

1. **Error:** The file /home/-my username-/public_html/
includes/*filename*.php has been encoded with the ionCube PHP
Encoder and requires the free ionCube PHP Loader to be installed.
- Go to www.ioncube.com and download the loaders for your server

2. **Error:** The encoded file /home/-my username-/public_html/
includes/*filename*.php is either expired or corrupt…
*- Reupload all includes/sources files in **BINARY MODE***.

Quick Tips
See our knowledgebase for some quick how-to's.
