Managing
All Domains

Default Address Maintenance

Select the domain to configure

Send all unrouted email for the following domain:

Current Setting: all@tmail.thehp.pro

☐ Discard the email while your server processes it by SMTP time with an error message.

Failure Message (seen by sender)

☒ Forward to Email Address

Forward to Email Address:

Advanced Options ▾

Enter the email ID created in #1

Repeat above step for all domains you want to configure under TMail Script.

#3 – Configure config.php

```
<?php
$config['title'] = "TMail Script";
$config['host'] = "mail.thehp.pro";
$config['user'] = "catchall@thehp.pro";
$config['pass'] = "password";
$config['domains'] = array("tmail1.tk", "tmail2.tk", "tmail3.tk", "tmail4.tk", "tmail5.tk");
?>
```

\$config['title'] - Enter the site title in first option

\$config['domains'] - Enter hostname provided by your Email / Hosting Provider

\$config['user'] - Enter email ID you created in #1

\$config['pass'] - Enter password you use to create the above email ID in #1

\$config['domains'] - Enter the domains separated by comma (,) under double quotes
